ABOUT ME

I am a Computer Engineering graduate with a strong foundation in data science and engineering from Nepal. My professional journey has deepened my passion for utilizing data to solve complex problems and tell stories. I am now eager to explore advanced computing topics and enhance my expertise in data science to drive innovative solutions in the field.

EDUCATION

Bachelor's in Computer Engineering - Entrance Rank (171/16000) IOE, Pulchowk Campus, TU (4% acceptance rate) Percentage: 77.78%	2018 - 2023 Lalitpur, Nepal
+2 (11th and 12th grade) in Science Faculty Computer Science Specialization, CCRC CGPA: 3.72/4	2016 - 2018 Kathmandu, Nepal

EXPERIENCE

Data Engineer <i>Maitri Holdings Services Pvt. Ltd</i>	August, 2024 – Present Dhobighat, Lalitpur
- Building and optimizing SQL models for US healthcare data analysis to support informed decision-making. - Utilizing DBT (Data Build Tool) and Jinja templates to automate data transformations and streamline data modeling processes.	
Associate Data Scientist <i>Locmatic</i>	March, 2024 - August, 2024 Jhamsikhel, Lalitpur
- Implemented Large Language Models (LLMs) and LangChain to extract structured menu data, enabling more efficient data processing. - Utilized Snowflake as the primary data storage solution for enhanced data accessibility and security. - Performed advanced querying for data extraction and analysis, optimizing data processing workflows.	
Fraud and Automation Strategist <i>Daraz Nepal</i>	January, 2024 - March, 2024 Thapathali, Kathmandu
Automated the detection of prices and expiry dates on product images using PaddleOCR for text extraction, with Jenkins for automation and scheduling. Reduced manual verification time by 80%.	
Data Analyst Trainee 2023 <i>Daraz Nepal</i>	July, 2023 - December, 2023 Thapathali, Kathmandu
- Built a Forecasting Model to forecast topline KPI of Daraz like DAU, Orders, Warehouse Items using TFT and AutoARIMA Model. Model showed the accuracy of 87%. - Developed an image-based algorithm to identify the best price among similar products on Daraz, enhancing competitive pricing strategies. - Optimized data extraction processes using advanced SQL techniques, improving data quality.	
Data Structures and Algorithms (DSA) Course Developer Link <i>Mero School</i>	2022 Tripureswor, Kathmandu
- Created comprehensive course content, covering fundamental concepts, algorithms, and data structures relevant to computer engineering. - Successfully launched the course on MeroSchool, gaining positive feedback from students and industry professionals alike.	

PROJECTS

Live Camera Feed Scene Descriptor for Visually Impaired | [Link](#)

Describes the activities on the video captured from live camera feeds using **Flutter** based App, based on **Computer Vision** and **ML (GIT-base-vatex model)** and **WebRTC** for real time communication.

Face Recognition Smart Attendance System App | [Link](#)

Developed a Flutter app that recognizes and stores student faces in real-time to a database using MTCNN for face detection, FaceNet for feature extraction and SVM for classification.

Achieved the accuracy of 97% on testing data

Decision Tree Classifier from scratch and its application using Python | [Link](#)

Datasest - Covid 19 and Purchase from Social Media

Covid-19 dataset has more data and more accuracy of 98%

Purchase from Social Media has less data and has an accuracy of 87%.

Visualization of Dijkstra's and Quick Sort Algorithm using SFML Graphics Library | [Link](#)

Created a Job Vacancy and internship website for College using MERN(MongoDB, Express.js, React.js, Node.js) Stack | [Link](#)

RELEVANT SKILLS

Programming Skills

Proficient: Python (NumPy, Pandas, Scikit-learn, TensorFlow), C, C++

Intermediate: JavaScript, Flutter, Django

Machine Learning AI

Concepts: Computer Vision, Natural Language Processing (NLP), Large Language Models (LLMs, Langchain)

Time Series Forecasting: ARIMA, Temporal Fusion Transformer (TFT)

Cloud and DevOps

AWS: S3, EC2, ECS, DynamoDB

Automation: Jenkins

Data Management Analysis:

Databases: Advanced SQL (Postgres, MySQL, DBT, Jinja Template), Snowflake, BigQuery

Data Visualization: Power BI

VOLUNTEER EXPERIENCES

Organizer at Yomari Coding Competition at LOCUS 2023

2023

Involved in management of a technological event that involved more than 100 participants

Organizer at Photography Competition at LOCUS 2023

2023

Successfully organized the Photography Competition at LOCUS 2023, showcasing the diverse talents and perspectives of participating photographers.

Video Editing Lead at Hult Prize at IOE 2023

2023

Led the video editing team at Hult during IOE 2023, overseeing the production of high-quality video content for various projects and initiatives.

TRAININGS CERTIFICATIONS

- BI Workshop by LIS, Nepal (2023)
- AWS Academy Cloud Foundations Certification
- Deep Learning by DeepLearning.AI
